

# The Foulsham Collection 1 Butterflies

Butterflies & Moths, collected in southern England in the 1st half of the 20th century by Chester Foulsham (1887-1977), and continued by his son John (1925-2019), an architect who lived in Albury from 1965.

John's widow Daphne, in conjunction with Butterfly Conservation Surrey & SW London branch, kindly donated the collection to Holmesdale Natural History Club Museum in 2020. The museum is in Reigate. Viewings by appointment via [www.hnhc.co.uk](http://www.hnhc.co.uk)
